Graphic Designer

SeeSaw Advertising is a full service advertising agency based in Rundle St, Adelaide. After nearly 5 years of being with us, our lead designer is leaving us to try something new.

Enough about us. Let's talk about you.

Firstly, you're experienced. After at least 4 years working as a designer you know what you're doing with Creative Suite on Mac OSX. You're creative, technical and efficient. Your written and verbal skills are excellent and you can use both of them to explain your work. You're passionate about design. You're motivated to improve yourself with every new project. You like a challenge and you like to challenge. You can flick between annual reports, retail advertising and corporate ID work without having a 'precious' moment to recharge, and the phrase "design a website" doesn't make your Wacom tablet go all shaky (don't worry, we don't make our designers do code!).

If this sounds like you, and if we sound like an agency that you would like to work for, then send us an application by PDF (under 4Mb...not a penny more!), a link to a website that shows your work or dazzle us with a hard copy submission. All of the contact info is on the website - www.seesawadvertising.com.au, so have a look before you send us something.

We need the position filled by the end of April and will be interviewing as we receive applications. We'll fill the position as soon as we find the right person. Money is mid to high \$40ks based on experience.
